CATALOGUE
OF
THOROUGH-BRED JERSEY CATTLE,
THE PROPERTY OF
MRS. E. M. JONES,
BELVEDERE,
BROCKVILLE, ONTARIO.
CANADA.

Brockville is situated on the River St. Lawrence, just at the foot of the Thousand Islands. It is opposite Morristown, N. Y., (on the Utica and Black River Railroad.) A steam ferry runs between Morristown and Brockville, connecting with the New York trains. The Grand Trunk Railway also passes through the town, and all boats stop at this port—affording excellent facilities for shipping. *Belvedere* is on the outskirts of the town, about 10 minutes walk East of the Post Office, on the River road, *Post Office Box 82.*

Brockville is only 14 hours from New York. Visitors starting from N. Y. at 9 p.m. get a sleeping car and reach Brockville at 11 next morning, or can reach Brockville at 6 p.m. Trains leave for New York at 8 a.m. and at 4 p.m. On Grand Trunk Railway, two express trains each way every 24 hours.

All stock delivered, free of charge, with halter and feed, on cars at Brockville, or at Morristown, N. Y., or boxed and delivered to Express Office at either place, if desired.

Visitors made welcome at all times.

BROCKVILLE, ONT.:
PRINTED AT THE TIMES OFFICE.

1884.

TO THE PUBLIC.

In preparing a catalogue of my small herd of Jerseys, part of my plan was to illustrate it with wood Cuts. So frequently, however, I have heard it urged against wood cuts, that they are not *of necessity* a truthful representation of the animals in question, that I abandoned the plan.

The idea then presented itself to me of having some of my cattle photographed *directly into the Catalogue*.

Of course this involved an immense amount of labor, and a very great expense, but I hope I shall be more than compensated for these by the fact that I am able to present to the public an *absolutely truthful and correct likeness* of the animals, as they actually appear, before the photographer.

For, in the words of the immortal Salem Scudder, in the play of "The Octoroon."

"The Apparatus can't Lie."

To Mr. Alexander Murray, of the firm of Murray & Son, Brockville, my thanks are due for the artistic skill, the endless patience, and the untiring perseverance he has displayed in the faithful execution of a most troublesome task.

E. M. JONES.

BELVEDERE, BROCKVILLE, MAY 1, 1884.

THE GREAT STOKE POGIS--VICTOR HUGO FAMILY.

At the head of this wonderful family of buttermakers, stands the most extraordinary Cow (so far as tested) that the world ever saw, Mary Anne St. Lambert. She has just completed the *tenth month* of her yearly test, and the summing up, so far, is the almost incredible yield of *838 lbs. 11¼ oz.*, of marketable butter, in 310 days !!! And she is due to calve again in July.

Is it any wonder that the name of this cow has become a household word all through the land, and that, with every lover of good stock in America, the absorbing question of the day has become, "How can *we, individually*, become possessed of a Mary Anne, of St. Lambert?"

My answer to that question is, "Do as we have done before, in the case of phenomenal cows. Study her pedigree carefully; note the different blood elements it contains; decide in your own minds from which source, or sources, she derives her excellence, *and breed accordingly?*"

Perhaps no living person has had a better opportunity than I have, for a careful and unbiased study of the St. Lambert Cattle, living, as I do, only about 100 miles from their home, and the result of many years close watching of this herd, is, a *settled conviction*, that the Victor Hugo, Pauline, Amelia, and Pride of Windsor bloods, contribute *fully as much* as the blood of Stoke Pogis 3rd., to the excellent dairy quality of these animals.

With the four Jerseys mentioned, I have been familiar for years, and I can safely say, that I have rarely seen their equals, being the chief animals in a small, and then isolated herd, they were of necessity, bred together, and their blood became, in a great measure, identical.

Witness, the test of Jolie of St. Lambert 5126, with no Stoke Pogis blood, in 7 days, 298 lbs. milk, an average of over 42 lbs a day. Yield of butter, 15 lbs., 13½ oz. in 7 days. But, during the last three days of test, Jolie averaged 2 lbs., 7 oz. a day, at the rate of over 17 lbs. a week. Maggie, dam of Victor Hugo, (no Stoke Pogis blood), tested 17 lbs. in 7 days. Clematis of St. Lambert 5478, being 25 per cent. Victor Hugo, and 25 per cent. Pauline blood, with *no* cross of Stoke Pogis, yields 20 quarts milk daily, and tested, in early May last year, on winter feed, 285 lbs, milk in 7 days, which yielded 14 lbs., 3 oz. splendid yellow butter. Pearl of St. Lambert, 5527, 25 per cent. Amelia, and 12½ each of Victor Hugo and Pride of Windsor, and *no* Stoke Pogis blood, yields 17 quarts milk daily, and made on winter feed, 14 lbs. 2 oz. in one week.

Oaklands Nora, 14,880, with *four* crosses of Victor Hugo, and two of Pauline, will yet be heard from, (judging from past performances) as a wonder.

So much for the strain which for convenience sake, we will call, the "Victor Hugo."

Now, this blood, (and *please mark* these words, for I believe they are the key to all our future success, with this family.) This blood, I say, crossed with the Stoke Pogis 3rd, (or Rieter) strain, seems to *combine* the excellence of *both* these noted families, and *almost to double* the productiveness of each.

Besides Mary Anne, witness Diana, of St. Lambert, 16 lbs , 8 oz butter a week. She is 50 per cent. Stoke Pogis 3rd, *and also* 25 per cent. Victor Hugo. Also Moth of St. Lamberts, with Victor Hugo twice, Pauline, Pride of Windsor, and Amelia each once, in her pedigree, and Stoke Pogis 3rd on the other side; 16 lbs in 7 days, 8½ *months* after calving, and again in calf, and not then four years old!

Minnette of St. Lambert, a perfect marvel of a cow, that bids fair to equal Mary Anne, is Stoke Pogis on one side, and has two crosses of Victor Hugo, and one of Pauline.

Honeymoon of St. Lambert, 32 lbs. milk with first calf, is Stoke Pogis, *but*, also, victor Hugo, Pauline and Amelia. Honeymoon has just tested over 20 lbs. butter, in one week.

Matchless of St. Lambert, 9,773, 11 lbs., 6 oz. in 7 days, before two years old, is Stoke Pogis, but has, also, two crosses of Victor Hugo, two of Pauline, and one of Pride of Windsor.

Nymph of St. Lambert, 27 lbs. milk daily, with first calf, is Stoke Pogis, Victor Hugo and Pauline.

Nancy of St. Lambert, 12lbs., 13½ oz. with first calf, is also, the Stoke Pogis and Victor Hugo combination but further comment is useless.

Enough, I think, has been said, to prove that *nowhere* is the famous Rieter blood more valuable, than where it is crossed with the no less wonderful blood of Victor Hugo, Pauline, Amelia, and Pride of Windsor.

Living, as I do, so near St. Lambert, and being so familiar with this herd, my opinion may, perhaps, carry some weight, and, if the expression of it helps any one to buy, or to breed, a better cow than any he has already owned, then I shall have written to some good purpose.

E. M. JONES.

TABLE OF TESTS

Of the Stoke Pogis-Victor Hugo Family, so far as Authenticated.

In order to prevent so much needless repetition as to records, etc., under the different pedigrees, of the Stoke Pogis-Victor Hugo Family, it has been decided to place all information, in a condensed form, upon these pages, anyone interested, can refer to this table, and see, in a moment, the standing of any animal, either as to individual records, or, as having the power of transmitting their good qualities to their offspring. And no one can study these pedigrees, without being impressed by the fact, that Eurotas, and Mary Anne, of St. Lambert, are *near relatives*.

PRIDE OF WINDSOR.
Imp., 483.

This is one of the grandest bulls ever bred at St. Lambert. He is very large and of *grand* constitution—long light neck, Rioter head, small yellow horns, thin withers, and superb barrel. He is of immense length, great width of hips, wonderfully deep in flank, with a rich, soft mellow hide. His limbs are exceedingly fine, his tail fine and slender, with heavy black switch. He is silvery fawn on the back, shading heavily into black, with full black points and tongue. The indications of dairy merit possessed by this animal will challenge competition with any other animal in the world. He has 100 per cent. of the same blood element as Mary Anne, of St. Lambert.

COW.

DIANA OF ST. LAMBERT.

6636.

Dropped March 29th, 1877.

Record—16 lbs. 8 oz. butter in one week.

A superb dairy cow, with immense wedge shaped body, short fine limbs, thin withers, long thin neck, and Rioter head. Her color is a rich fawn, shading dark, with black points. She has a soft, rich skin, enormous milk veins, and an enormous udder, with large, well placed teats. Nothing can excel the richness and beauty of her stock. Her grand-daughter, Rioter's Queen, I consider one of the finest Jersey heifers living. (See illustration in this catalogue, taken when the heifer was *only 33 months old*.)

Diana's last calf, a bull, is one of the most beautiful and highly bred calves in the world, having over 90 per cent. of the same blood elements as Mary Anne.

Diana has 87½ per cent. of the same blood elements as Mary Anne.

Price \$

HEIFER.

LISGAR'S ELLA.

Dropped in 1881.

Fawn color, long, slim neck, lovely head and horns, thin withers, large roomy body, short fine limbs, and rich, soft, yellow skin. This beautiful heifer is 37½ per cent. *Victor Hugo*, which per centage is only exceeded by *very few* living animals. She is shortly to calve, by Rioter's Pride, the calf, therefore, will be 25 per cent. Stoke Pogis 3rd. and 18¾ per cent. Victor Hugo. Lisgar's Ella, herself, has 62½ per cent. of the same blood elements, as Mary Anne.

CHARITY OF ST. LAMBERT.

A 20 Quart Milker. For Butter Record see Pedigree.

Taken three months after calving, on winter feed.

COW.

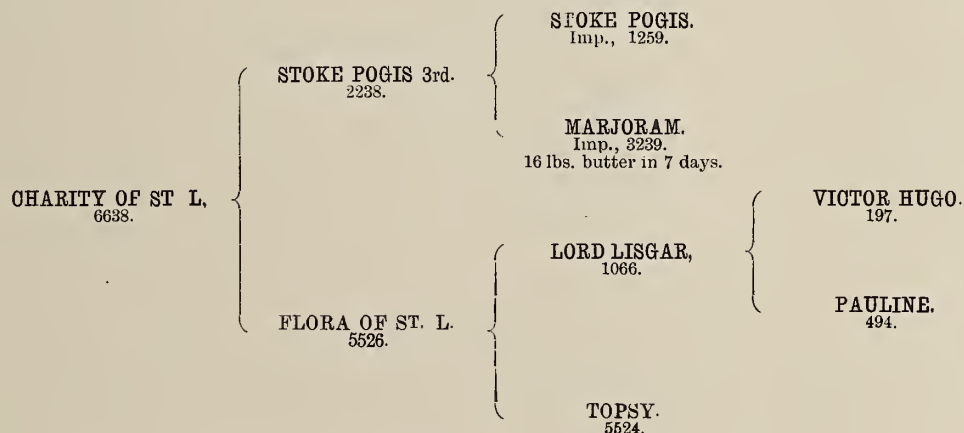

CHARITY OF ST. LAMBERT.

6638.

Sold for \$2,750.00

Dropped May, 1877.

Record :—Six months after calving, and again 3 months in calf, and on such poor grass that it was nearly starvation, and not another mouthful of food of *any kind*, Charity made 10½ lbs. butter a week with ease. She milks, when fresh, 20 quarts a day. Her stock are all wonderful for beauty and richness, and she almost invariably has heifer calves.

Charity is a very large cow, tremendous barrel, great constitution, and enormous feeder. She is a solid cream fawn, dark points, rich yellow skin, fine escutcheon, and a magnificent udder and teats. She has most wonderful milk veins, large and knotted, and the most extraordinary thing ever known on a Jersey, viz. : *five milk holes*, two on one side and three on the other. Both as a butter maker and a breeder, she ranks among the choicest of the Stoke Pogis Victor Hugo family. She has *75 per cent.* of the same blood elements as Mary Anne.

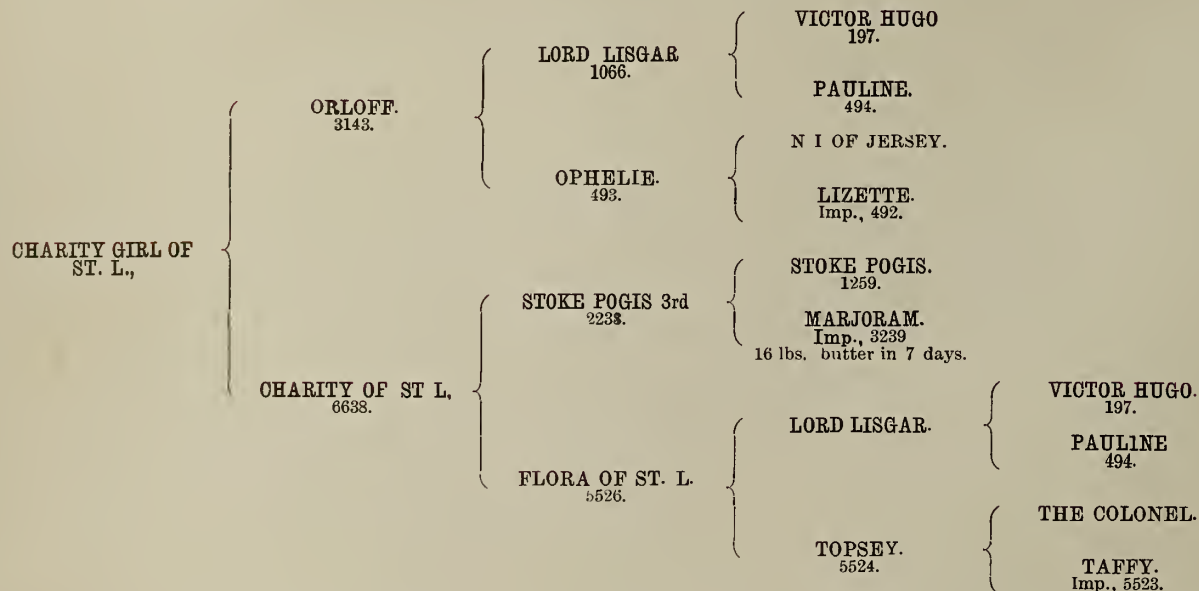

Bred to Rioter's Pride, March 24, 1884.

Price \$

HEIFER.

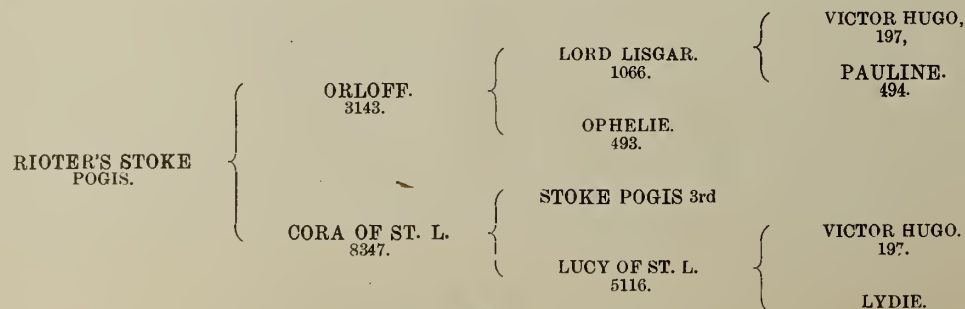

CHARITY GIRL OF ST. LAMBERT.

Dropped April 13th, 1881.

Solid cream fawn, dark points, capacious body, long neck, short limbs, great feeder. richest yellow skin, soft and silky, fine escutcheon and wonderful udder development. Dropped a heifer calf at 21 months old, and has never been dry since. *All the Charity family are alike* in color, (a creamy fawn) in large size, in strong constitution, in great appetite, in rich soft skin, and all are enormous and rich milkers and great heifer breeders.

Charity Girl has 62½ per cent same blood elements as Mary Anne. She is due to calve, July 1884, by

PRIMROSE OF ST. LAMBERT.

A 20 Quart Milker.

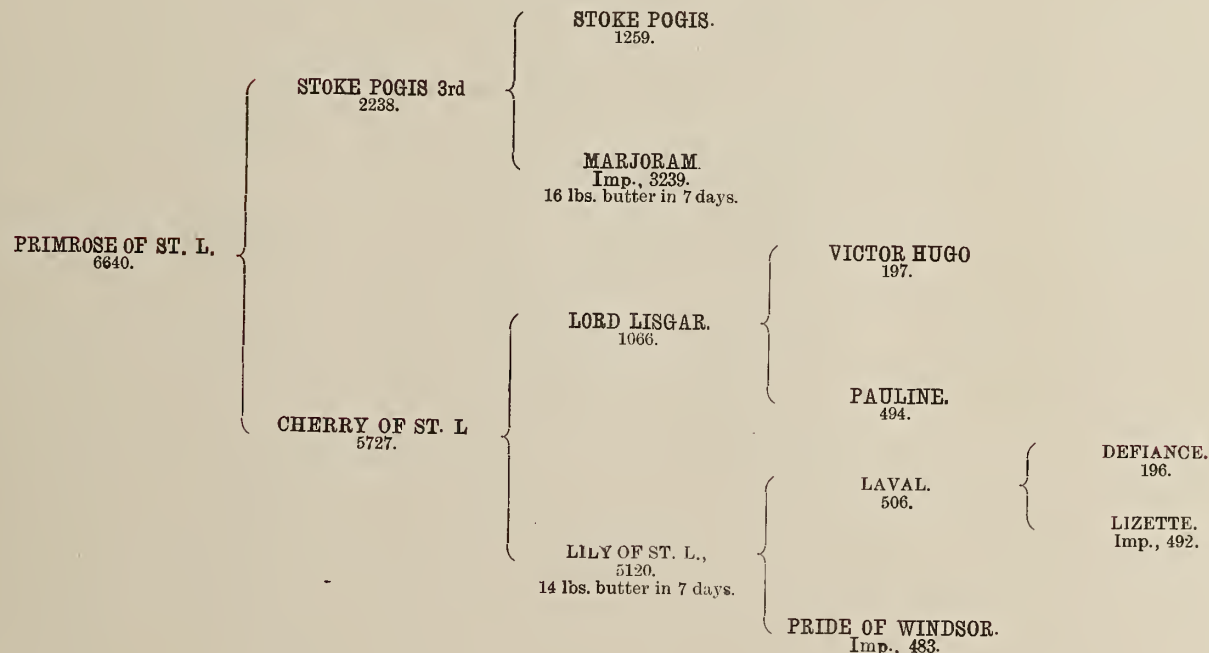

Taken *eight months* after calving, on winter feed.

COW.

PRIMROSE OF ST. LAMBERT.

6640.

Dropped May 8th 1877.

Primrose is a large, beautiful, solid silver fawn cow, light forequarters and wonderfully deep hindquarters, grand udder, an 18 quart cow, and breeder of some of the finest St. Lambert stock I have yet seen. Her Daughter, Matchless, has yielded as high as 20 quarts of milk daily, for Mr. Fuller and her 2 year old daughter, Primrose Sheldon, is one of the most superb heifers I ever saw. She has double milk veins, and two milk holes on each side, and a promise of dairy usefulness beyond anything I know.

Primrose of St. Lambert took 2nd prize in Toronto over 3 imp. cows, one of which had taken 1st prize over all Jersey. She also stood in my prize herd same time, with T. S. Cooper as judge. Primrose has 87½ per cent. same blood elements as Mary Anne. This cow has double milk veins and milk veins on both sides.

Price \$

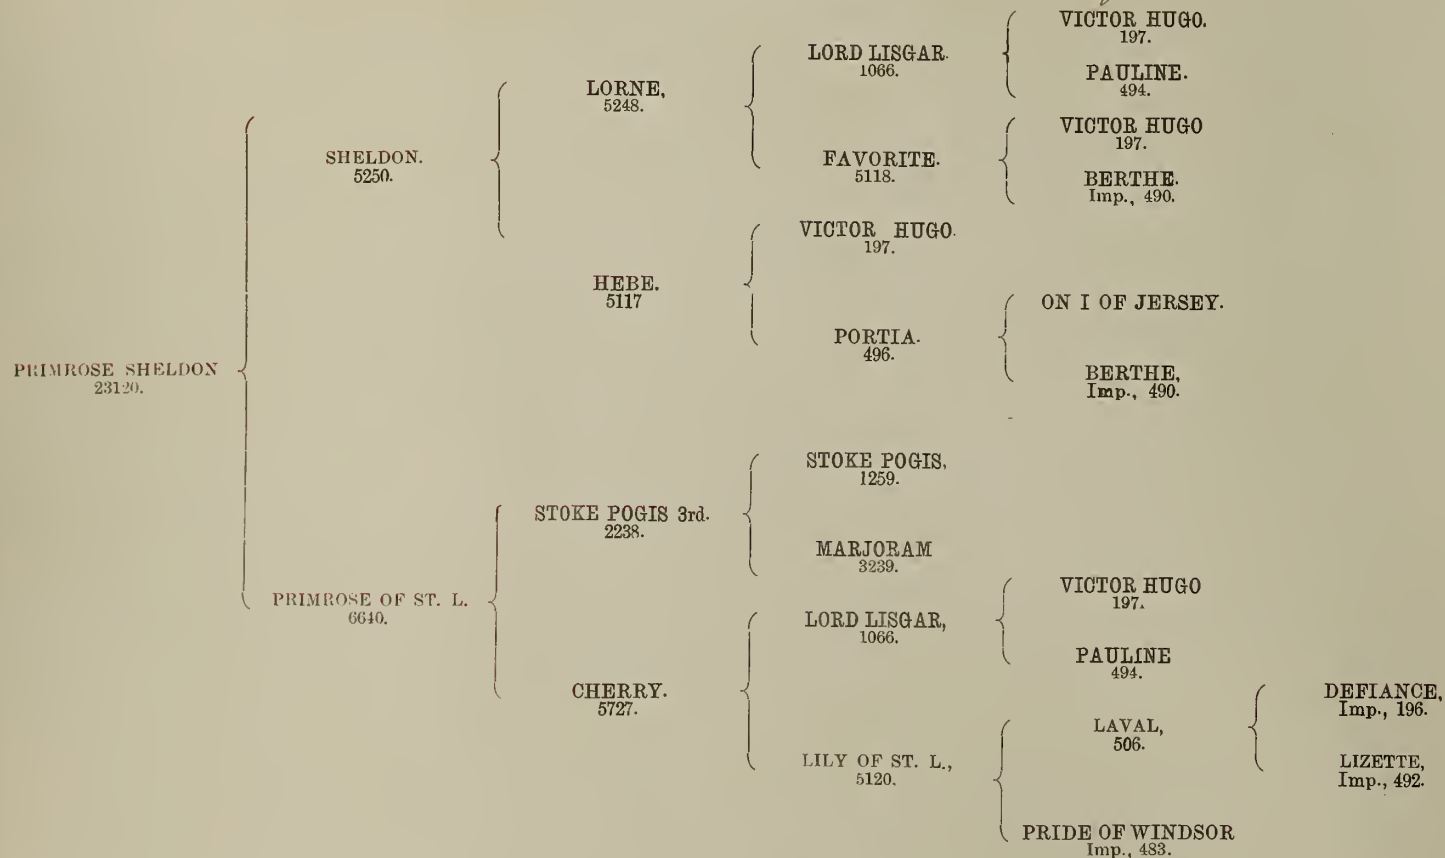

HEIFER.

PRIMROSE SHELDON.

23120.

Dropped spring of 1882.

Sold for \$1250.00

Solid grey fawn, full black points, deep yellow skin, grand escutcheon and udder development, large double milk veins and two milk holes on each side. This heifer closely resembles her mate, Ella of St. Lambert. She is one of the very finest of the St. Lambert stock, and, if she is well cared for, cannot fail to make a phenomenal record. She is 87½ same blood element as Mary Anne. She was bred on the 31st Jan., 1884, to Lorne Pogis, now owned by Messrs. Farley & Clarkson, and whose services are held at \$100.00.

See his pedigree.

THE SIGNAL FAMILY.

The great value of the Signal strain, consists in the individual power of Signal in getting butter cows. All of his daughters were good cows. I have personally investigated the history of his daughters by correspondence with their various owners, and their records are unquestionably trustworthy. SIGNAL got but fourteen registered daughters; one lost three teats by garget, and another lost one-quarter of her udder, and had another quarter badly injured by a wire fence. The remaining twelve show the following yields:

	lbs.	oz.
6712 Tenella (7 days).....	22	1 ½
5395 Croton Maid (7 days).....	21	11 ½
5300 Valhalla (14 days).....	34	—
5664 Belle of Paterson (7 days).....	16	6
6714 Fanny Taylor (7 days).....	15	12
6713 Edwina (7 days).....	15	13
5201 Aldarine (7 days).....	15	½
8614 Oenone (7 days).....	14	—
7838 Geranium 2d (7 days).....	12	4
7719 Signalana, on grass and no grain (7 days).....	12	—
6715 Optima, at 2 years old (7 days)	10	8
5304 Ethelberta, a number of months after calving, at rate (7 days).....	12	4

This is a record that no other family has thus far shown in the *immediate offspring* of the animal that has given name and character to the strain.

† HAZEN'S BESS. 7329.

This is one of the best and richest of the sons of old Signal, one of the most wonderful Jersey bulls, that ever lived. The merits of this great family are too well known to need description. Sir Signal is solid color, full black joints, of exceeding beauty, and great richness. Besides the noble blood which he inherits through his great sire, Signal, it will be seen that no fewer than *thirteen* of the animals, in his near pedigree, appear also equally close in the pedigree of the wonderful cow.

Now the property of Beech Grove Farm, having lately been purchased for three thousand five hundred dollars. Hazen's Bess has an official record of 24 lbs. 11 oz. butter in one week, in the month of November; and she is believed to be capable of far exceeding that task, under more favorable circumstances.

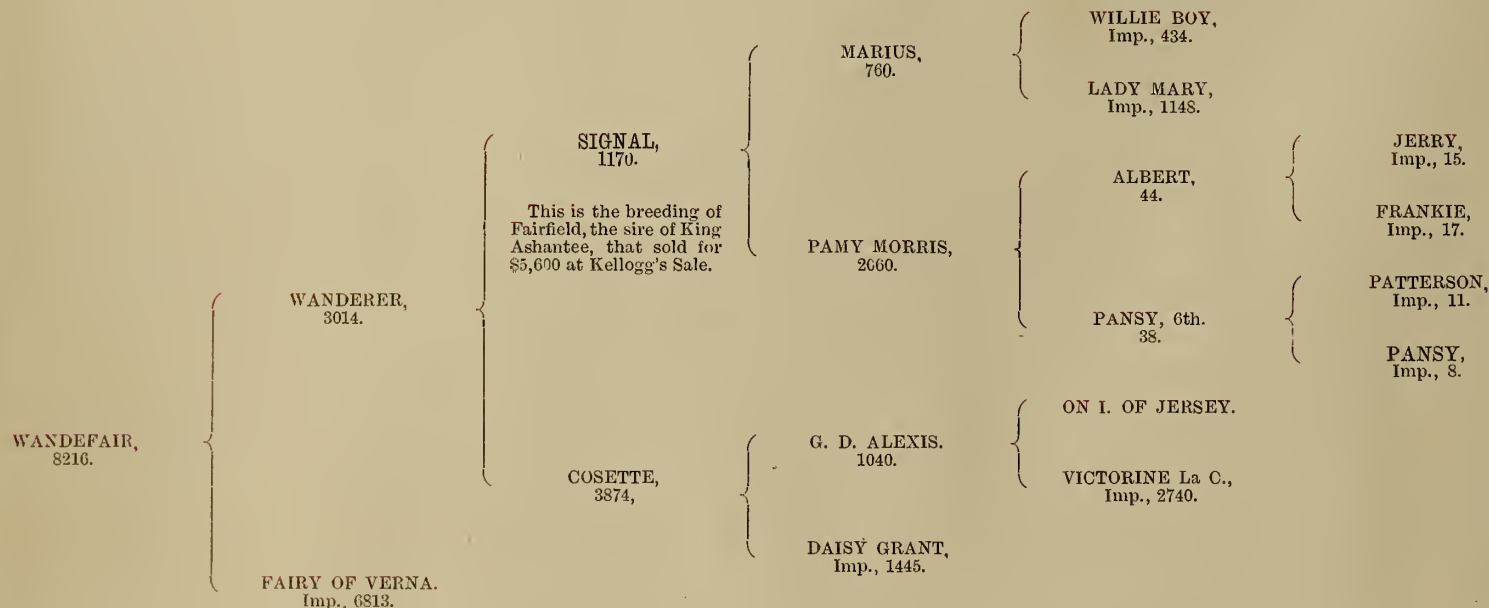

Price \$

BULL.

WANDEFAIR.

H. R., No. 8216, A. J. C. C.

Dropped February 26th, 1879.

Every one of his ancestors were noted for butter making.

This is probably the most important importation of Jersey blood ever made into Canada. In proportion to their numbers, the Signals stand, to-day, at the head of all Jerseys. This young bull is a perfect type of the family, and was selected by that veteran Jersey breeder, Dr. O. S. Hubbell, whose judgment is universally admitted to be absolutely faultless. Dr. Hubbell pronounced Wandefair one of the best bulls he has ever seen, in all his experience, and says of his calves that they are all heifers, and that "they are wonders." Wandefair is brother to Footstep, for which Mr. Bronson has *just refused, three thousand dollars*.

Wandefair's sire, Wanderer, has just been sold at public auction, although an old bull, for over two thousand dollars.

BULL.

RIVAL.

Imp. A. J. C. C. H. B. 3762.

R. J. H. B. 143.

Dropped February, 1876.

Registered as prize stock.

Bred by Wm. Alexander, St. Martins, Island of Jersey.

Sire, Jolly, 230. Royal Jersey Herd Book.

Dam, Daisy, 884. Royal Jersey Herd Book.

Solid golden fawn, full black joints, light neck, beautiful head and eyes, small crumpled amber horns, long body, grand barrel, deep hind quarters, splendid escutcheon, and limbs delicately fine.

For beauty RIVAL cannot be excelled in America. His golden coat glitters in the sun, and is as fine as silk both winter and summer. His skin is as yellow as an orange, so that a pocket handkerchief rubbed in his ear looks as though stained with yellow paint, and his hide is as loose and soft as velvet. Health and condition superb. Disposition perfect. He is half brother to the grand cow in this catalogue, Imp. FLORA, of St. Peters, which please note.

Of DAISY, 884, dam of RIVAL, Mr. LeBrocq wrote that she was the best cow he had *ever seen or ever heard of* on the island of Jersey.

JOLLY, 230, sire of RIVAL, was also sire of QUALITY, 1748, H. C., winner, of 1st prize and champion cup, R.J.A.S., 1882, and she made 16 lbs. 8 oz. butter in 7 days.

He was also grand sire of HAPPY, 309, who sired the notorious ASTER 2nd, who won first prize over the Island, in 1883, in class of heifers in milk, and the Champion Cup, as best animal in the show, competing against cows of all ages. In the following August, she was again awarded 1st in her class, and Champion Cup against all competitors. HAPPY also sired CASSANKRA 2nd, 1st prize and Silver Medal at London Dairy Show, 1882, and 2nd prize over all Jersey in 1883.

RIVAL himself sired the celebrated Lady Beaconsfield, 11897, winner of 1st prize at St. Peters, Jersey, in 1879.

In America, Rival has taken:—

1st prize at Queens' County Fair, New York.

2nd prize at Great International Dairy Fair, New York, being only beaten by his close relative, Gold Cup, who then sold as a yearling, for *One Thousand Dollars*.

1st prize, Great Canadian Industrial Exhibition, Toronto.....1882.

" of 1st	" yearling bull	"	"	"	1883.

The latter also took Silver Medal, as best Bull in Canada then, against tremendous competition, although *only 23 months old*.

It is worth while mentioning that this young Bull was not only sired by Rival, but that his dam, was *Rival's own half sister*, Imp. FLORA, of St. Peters.

NOTE.—In my prize herd, in 1882, were Rival and his half sister, Flora; and in my prize herd in 1883, were Rival, his half sister, and one of his daughters.

Price \$

BULL.

RIVAL'S FLORIST.

11764.

Dropped October 1881.

Solid fawn, full black points, a grand young bull that can be equalled by few for beauty or breeding, and with the reputation of his family, on both sides, for butter or prizewinning, should be fit to head any herd.

RIVAL'S FLORIST. 11764.	{	IMP. RIVAL. 3762. See Rival's pedigree.	{	JOLLY. 230.
				DAISY. 884.
	{	IMP. FLORA OF ST. PETERS. 16 lbs. 5 ozs. butter in 7 days at 4 years old, on green feed only, seven months after- wards, 11½ lbs. in 7 days. See Flora's pedigree.	{	PRINCE.
				DAISY. 884.

Florist took 1st prize and Silver Medal over all bulls in Canada, at Guelph, 1883, though only 23 months old.

He is sire of the heifer calf that took

2nd prize at Toronto.....	1883.
2nd " Guelph.....	1883.

He is also half brother of the bull, Gold Cup, that took 1st prize at the great International Dairy Fair, N. Y., and sold for *one thousand dollars*.

Price \$

COW.

IMPORTED FLORA OF ST. PETERS.

8622,

Am. J. C. C. H. B.

Dropped January, 1876.

Fawn and white, white switch, one of the most perfect types of a Jersey cow to be found anywhere. She is long, broad on hips, deep in flank, a most capacious body, on short fine legs, skin rich as gold and a superb udder, that measures, when fresh, 54 inches around. She is in Major Brown's new list with a record of *16 lbs. 5 oz. butter in one week, at four years old, and on green feed only.* Seven months afterwards she made $11\frac{3}{4}$ lbs. butter in one week.

ST. PETERS.
8622; 16 lbs. 5 oz. a week,
at 4 years old, green
feed only.

PRINCE ON ISLAND

DAISY, ON ISLAND

884

See page

Flora is the dam of Gold Cup, 1st prize at the great International Dairy Fair, over "Much Ado," and many other fine bulls, and who was then sold as a yearling for one thousand dollars. She is also the dam of "Rival's Florist," the young bull that took 1st prize and silver medal, over all bulls in Canada, at Guelph, 1883.

Flora has been four times exhibited and a prize winner every time, and she has twice stood in my Prize Herd.

Her greatest triumph was last fall, 1883, when with T. S. Cooper as judge, she took 1st prize, in her class, over all Jersey cows in Canada, including three superb imported cows, one of which, had taken first prize over the whole Island of Jersey.

Flora is half sister to the splendid bull, imp., Rival, in this catalogue.

No.

Dropped March, 1880.

Fawn and white, with deep orange skin, grand escutcheon, beautiful udder, a large and *very rich* milker, and grand breeder.
Bred to *Lorne Pogis*, on March 1st, 1884.

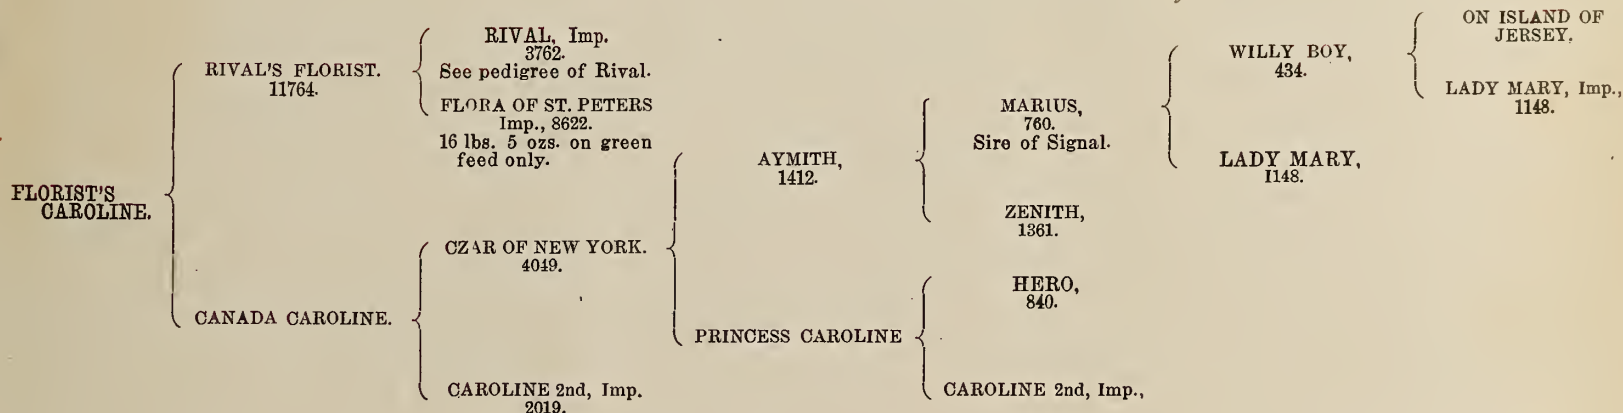

Price \$

HEIFER CALF.

FLORIST'S CAROLINE.

Dropped 30th May. 1883.

Sold for \$400.00

Fawn and white, skin rich as butter, superb escutcheon and udder, orange teats, placed well apart, level back, deep flank, fine head, thin neck, very deep and capacious body, on short fine legs. This heifer unites the great blood of Imported Rival, with the blood of Signal, and of the Carolines, noted as butter stock and prizewinners. Bred to Lorne Pogis, 11255, March 7th, 1884.

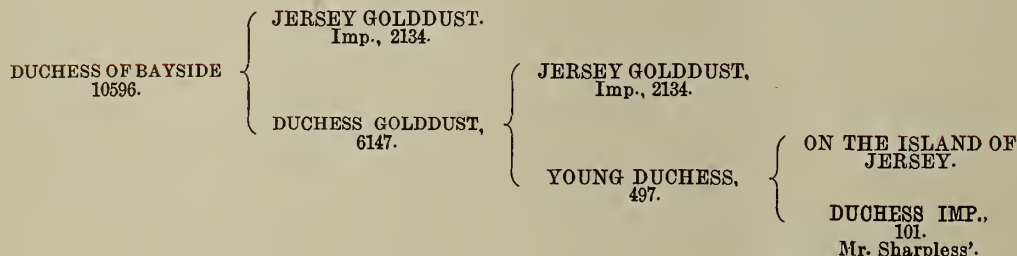

Price \$

COW.

DUCHESS OF BAYSIDE.

10596.

Dropped April 20th, 1880.

Solid rich fawn, full black points, light fillet, a most beautiful young cow, and of the highest breeding. She is *blind* through accident, but no one would believe it, as her eyes are large and lustrous, and she finds her way about readily.

To calve in ~~July~~ by Rioter's Stoke Pogis. See Ella of St. L.

*Has just dropped heavy calf, 100 lbs in Oct
Price \$500.00 when bred to the male
of St L, in Rioter's Prize, as
desired.*

IMPORTED MISLETOE.

COW.

IMPORTED MISLETOE.

5857.

Dropped June 5th, 1877.

Orange fawn, white switch, long beautiful neck, exquisite head, prominent eyes, small horns, dished face, grand udder, *an ideal cow*.

Mistletoe has been four times shown and a prize winner every time, and has twice stood in my prize herd. At Toronto, 1883, I took 1st, 2nd and 3rd prizes, in one class, with Flora of St. Peters, Primrose of St. Lambert, and Mistletoe, beating a noble string of cows, one of which had been first prize over all Jersey. T. S. Cooper, who was Judge, pronounced Mistletoe the finest cow on the ground, and would have passed her first, but she had lain on a stone and bruised her udder, which he thought a natural defect, till after the prizes were awarded. Upon learning the facts he published, in his report, his opinion that Mistletoe was the best cow on the ground. Mistletoe's heifer calf, in 1882, was first prize, and her bull calf of 1883, was 2nd at Toronto, and 1st at Guelph, though only seven weeks old, and has gone to head a fine herd in Illinois. Mistletoe will calve in August, by Rioter's Pride.

SPECIAL NOTE.—It will be seen that the great cow, Princess 2nd, with her amazing record of 27 lbs. 10 ozs. butter in one week, is almost universally believed to have attained her proud pre-eminence through the happy mixture of the blood of *Welcome*, 166, with that of the great Coomassie. Observe that Mistletoe is a *granddaughter* of *Welcome*, and in calf to Rioter's Pride.

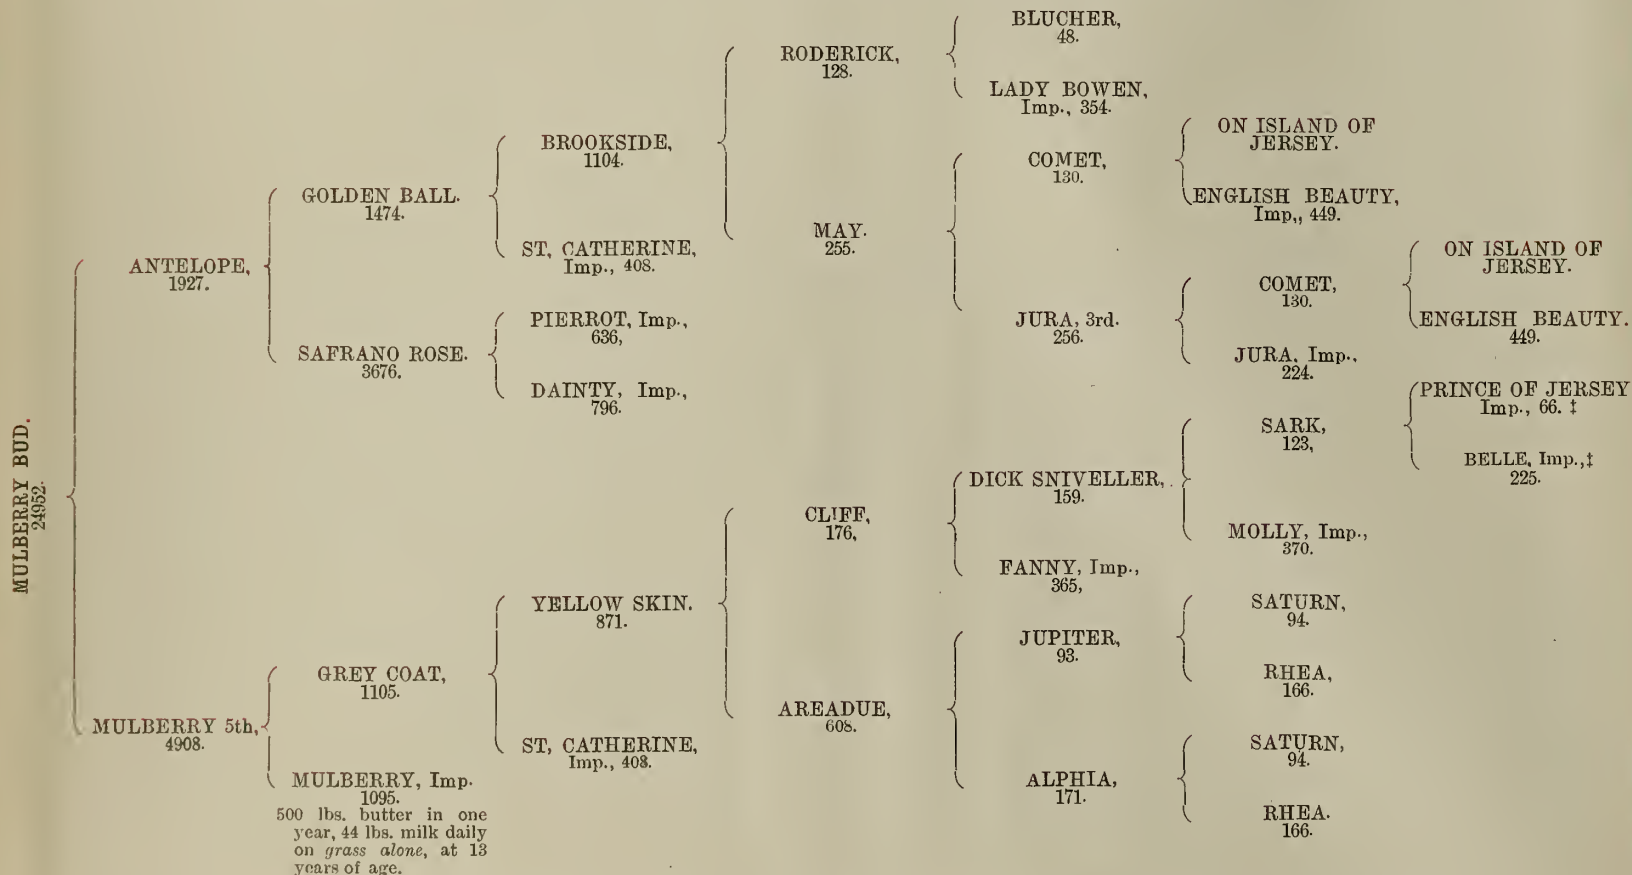

Price \$

COW.

MULBERRY BUD.

24952.

Dropped March 10th, 1879. Record—13 $\frac{3}{4}$ lbs. butter per week on winter feed, after 2nd calf.

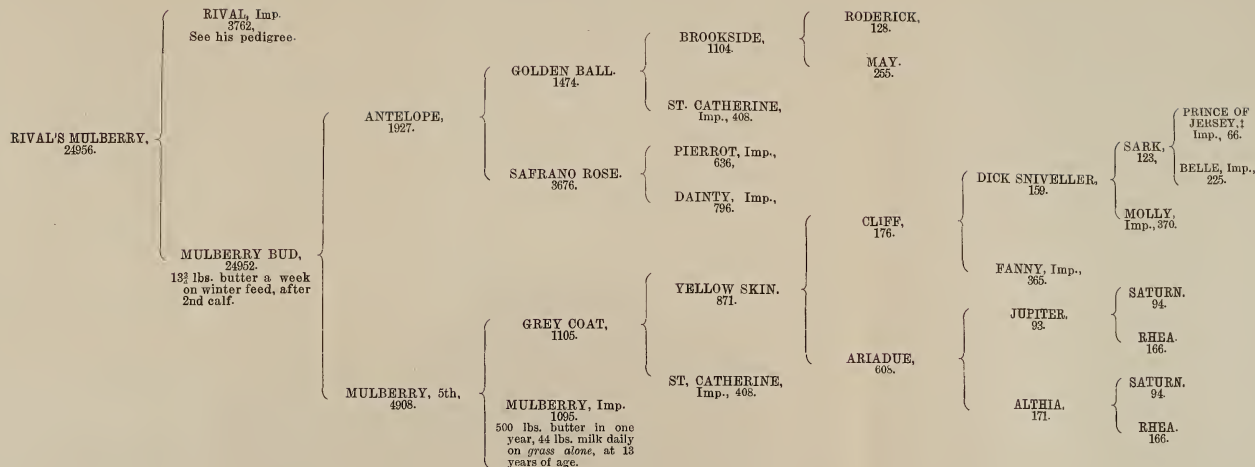

Fawn, white switch, rich yellow skin, grand udder. A perfect type of a fine dairy cow. Bred to Rioter's Pride the 20th February, 1884.

‡ In pedigree of Hazen's Bess, 7329. Official record of 24 lbs. 11 ozs. butter a week.

Price \$

24956.

Dropped December 15th, 1883.

A fine thrifty heifer with all the Dairy promise of her family.

‡ In pedigree of Hazen's Bess, 7329. Official record of 24 lbs. 11 ozs. butter a week.

Price \$

MAGGIE BRADLEY.

19177

Dropped August 12th, 1880.

† In pedigree of Hazen's Bess; record 34 lbs. 11 ozs. in 7 days.

Perhaps no living heifer, of her age, has such a wonderful pedigree, such a butter record, and such a prize record, as Maggie Bradley. Besides being a granddaughter of Litchfield, 1st prize at the Centennial, who sired Filbert, the great Centennial prize cow, with her record of 15½ lbs. butter a week, in November, at four years old, she has also 25 per cent of the blood of Bismarck, 292, who gives exactly the same proportion of his blood, by 25 per cent. to the wonderful cow, Hazen's Bess, 7329, record 24 lbs. 11 oz. in one week! Maggie has also, in her pedigree, Splendid, 2, twice, imp. Daisy, 241, so that she is, upon the whole, nearly 40 per cent. the same blood as Hazen's Bess. In color, she is a beautiful orange fawn, with a few white flecks, brown switch, form as near perfection as it is possible to be, rich yellow skin, magnificent udder, large, soft and silky, and milks completely away. With her 1st calf, at two years old, she milked 14 quarts a day, and made 350 lbs butter in ten months, before she was three years old. She also took, in her two year old form,

1st prize, Toronto	1882.
1st " Kingston	1882.
Stood in Gold Medal Herd, Kingston.	1882.
Took Silver Medal	1882.
As best Jersey in Canada.	1882.

Such a record, before three years old, is almost unheard of, in the history of Jerseys. Maggie Bradley was bred to the signal bull Wandefair, March 4th, 1884.

2050.

Besides being 25 per cent. of the blood of Imp. Bismarck, 292, exactly the same as Hazen's Bess (official record of 24 lbs 11 ozs in 7 days.) This young cow is also deep in the blood of Splendid No. 2, as well as Hazen's

Bess, being thus nearly 40 per cent. of the blood of that far famed cow. Maggie Rex is a large, handsome, orange fawn cow, white star in forehead, immense body, fine limbs, rich yellow skin, superb udder. In winter, after dropping 2nd calf, she milked 19 quarts daily, and made within a fraction of 14 lbs. butter a week. We had, however, no suitable way of setting the milk, and no proper convenience for testing a cow, and my herdsman was absent. Maggie Rex was bred, on the 13th April 1884, to Rambler of St. Lambert, who is nearly full brother to Mary Anne.

COW. MULBERRY, IMPORTED.

22031.

Dropped July 9th, 1879.

Bred by P. Neel, St. Johns, Island of Jersey.

A superb cow, with small amber horns, Magnificent body, fine limbs, and a large, faultless udder. She is light fawn, white below left hip and on right flank, brown tongue and switch. *Victor P-148-H. C.* was the sire of *Floribundis* 2d, 14949, that tested 18 lbs. 8 oz. at four years old for L. L. Tozier, Batavia, N. Y.; and of *Dairy Pride* 6th P., 521, 16 lbs. for Wm. S. Taylor, Burlington, N. J.; also of *Isabella* of Avon, 13428, 12 lbs. 12 ozs. for Mr. V. E. Fuller, Hamilton, Ont. *Tom P-77-H. C.* was the sire of *Brunette* Le Gros, 9755, that tested 16 lbs. for S. W. Robbins, Wethersfield, Conn. *Welcome R-172-H. C.* got *Stella* Le Brocq, 4956, that made 13 lbs. 3 oz. for Samuel J. Sharpless, Philadelphia,

Last calf Nov. 9, 1883. Served Dec. 27, 1883, by Winner, 5572. Winner is by Duke of Darlington, 2460, son of Eurotas, 2454, and sire of *Bomba*, while his dam is *Nellie* of Darlington, 5956, full sister to the dam of *Bomba*. Winner is therefore, full brother in blood to *Bomba*, that has the largest official record of butter in the world as a 3 year old, viz., 21 lbs. 11 1/2 oz in 7 days.

‡In pedigree of Hazen's Bess, 7329, official test of 24 lbs. 11 ozs. litter in one week.

Belle Steuben is orange fawn, white switch, a perfect model of a Jersey cow, with enormous udder. A reference to her test of milk and butter, in her two-year old form, is all that is necessary.
